

DIY DESIGN OFFLINE

General Notes

File Types

You can upload your design in any of the following file types:
.png, .svg, .jpg, .jpeg, .pdf, .psd, .gif, or .bmp.

Text Size

We suggest a minimum font size of **8pt** for most fonts.

Imagery

Photography and graphics need to have a minimum resolution of 1200dpi and the file size should be a maximum of 100MB.

Print Area

For **Single Colour Hotfoil Printing** - Please create your design as large as possible within the template print areas, to give your artwork the best chance of printing clearly. It would be helpful if you could create your designs in black and white.

For **Full Colour Digital Printing on Neapolitans** - You can print anywhere on the paper band wrapper but please keep in mind that the paper band will fold around the chocolate, with a front, side edges and back. So, you may wish to consider carefully what to place on the front and back and also to place content (e.g., your logo, graphics, text) within the dashed print areas to avoid running over the fold and onto the side edges.

We will check all artworks before manufacturing, and inform you if any designs look unsuitable for printing.

If you have any questions or difficulties creating your own design offline or uploading it to our website, please do not hesitate to contact **Richard, Aimee or Natalie** on **0800 371428** or email on **sales@delvaux.co.uk**

DIY Design Offline

Neapolitan Chocolates - Single Colour Print

Single Colour hot foil print design... There are times where very fine intricate detail may be lost and thin spaces between artwork tend to fill in. Lines should be .25 point (or .003") or thicker. We recommend avoiding reverses for hot foil printing.

Please prepare your design in black and white and make it as large as possible, filling the whole print area, with a minimum resolution of 1200dpi and a maximum file size of 100MB.

Print aspect

For Single Colour printing you can design in any aspect - vertically, horizontally, etc.

Print dimensions

For Single Colour printing you can print on the front and/or the back of the paper band wrapper within the 'print areas' only.

Front: 26 x 27 mm

Back: 26 x 21 mm
